Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/521,701	Applicant(s) SIM, SOON PENG	
	Examiner Robyn Doan	Art Unit 3732	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 is indefinite because the preamble recited an electrical device which comprises a container, however, the claim later recites the container in its entirety detachably connected to the electrical device.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 3732

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4, 6-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Sofer (USP 6,460,546).

Sofer discloses a hair device (figs. 1-3) comprising a container (16, fig. 3) having a first side (14), a second side (at 12), and an additive displacing member (12) being provided in the vicinity of the second side, the first side being covered by a base part (30) having a surface on which hair contacting elements (18a) and additive outlets (20) being provided, the surface having a depression (see fig. 2 at 30) that surround the additive outlets, electrical actuator means (see fig. 1) for forcing the additive displacing member toward the base part, the base part being in its entirely detachably connected to the container (threaded portion at 30, see fig. 3), the depression inherently collects residual additive and the container being in its entirely detachably connected to the electrical device (the container being in a cartridge form).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sofer.

Sofer discloses the claimed invention except for the hair contacting elements being brush hairs. It would have been an obvious matter of design choice to have the hair contacting elements being brush hairs, since applicant has not disclosed that any type of hair contacting elements solves any stated problem or is for any particular purpose.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Asfur, Gross et al are cited to show the state of the art with respect to a grooming device with electrical actuator means.
